Re: Weekly Report

- We are dealing with a filamentous green algae bloom on Lake Morey. The bloom is non-toxic and does not pose a health threat of any kind. The alum treatment should also knock down this bloom.
- Neighborhood Development Area application was sent to Jacob Hemmerick for a preliminary review. I am hopeful that we will have an acceptable package for the June meeting of the Downtown Board.
- Site plan review and conditional use hearing for Wings on Wednesday pretty much went off without a hitch, permit effective June 21, applicant submitted a landscape plan and stipulated to it, it will be a required element to receive a certificate of compliance.
- I am registered for the May 28th VCLT federal funding workshop.
- Issued permit 24-Z-15 for the approved Wings addition.
